Moab, Utah 84532

Re: Wastewater Approval

Dear Mr. Lammert:

We have reviewed the Division of Oil, Gas and Mining November 14, 1988 letter regarding your intent to mine the Vandium Queen Mine east of LaSal, Utah. A review of our files does not indicate that approval was ever issued for the use of a pond on the site. If there is industrial wastewater (including mine drainage) at the facility, required information such as flow rate, acceptable plans, pond volume and specifications must have approval by this Bureau. A best management practice plan for control of runoff from disturbed areas should also be submitted. The information for review should be submitted to:

David Ariotti  
6 East Main  
P. O. Box 800  
Price, Utah 84501  
(801) 637-3671

A former discharge permit for this mine has expired. A new application would have to be submitted at least 180 days prior to discharge. If you have any questions regarding a discharge permit please contact Steven McNeal at (801) 538-6146.

Sincerely,

Donald A. Hilden, Ph.D, Chief  
Permits and Compliance Section  
Bureau of Water Pollution Control
